TABLE E—SUMMARY FIGURES BY DISTRICTS AND TALUKS 335

TABLE A-I

Area, Houses and Population

This table shows for each district the area, the number of occupied houses and the total urban and rural population, male and female in the State.

2. District areas shown in column (2) of this Table are those supplied by the Surveyor-General of India. Local area figures furnished by the Central Survey Office, Madras, have been adopted for the Agencies. The area figures for the Plains have been arrived at by deducting the area figures for the Agencies from the district areas. The figures given in this table differ in varying degrees from those in Table E about Summary Figures of districts because the local figures furnished by the Central Survey Office, Madras, and the District Collectors had to be adopted for Table E, as area figures by rural/urban break up were not available with the Surveyor-General of India.

3. The 1931 definition of a house as "every dwelling with a separate main entrance," was continued at this Census. "Village" is the revenue administrative unit, not the residential village. "Towns" are places of usually not less than 5,000 inhabitants, possessing urban characteristics. Cantonments have been treated as forming part of the towns in which they are situated. A few places not having the population minimum of 5,000 have been treated as towns for the reason, that they possess definitely urban characteristics.

4. The total urban population is 11,183,734 and the urban/rural ratio 1 : 4.

NOTE.—Thirty-seven villages with a population of 50,905 (25,676 Males and 25,229 Females) which formed part of West Godavari *Plains* are included in West Godavari *Agency*.

TABLE A-II.

Variation in population during Fifty years.

This table compares the population as ascertained at the Census of 1951 with those of the previous Censuses. The figures recorded at the previous Censuses have been adjusted for subsequent territorial changes in order to afford a correct basis of comparison. The adjusted figures show the population of districts as constituted at present.

The main territorial changes that occurred during the decade are—

(*a*) The merger of the States of Banganapalle, Sandur and Pudukkottai with the districts of Kurnool, Bellary and Tiruchirapalli respectively.

(*b*) Bifurcation of old Visakhapatnam district into two districts, viz., Srikakulam and Visakhapatnam.

(*c*) Inter-district transfers in the districts of East Godavari, West Godavari, Nellore, Madras, Chingleput, Tiruchirapalli, Madurai and Ramanathapuram.

(*d*) The exchange of enclaves with the States of Mysore, Hyderabad and Travancore-Cochin.

The State totals affected on account of the transfers due to exchange of enclaves are shown in the following table:—

District.	*Adjoining State.*	*Net addition (+) and net subtraction (—)*		
		Persons.	*Males.*	*Females.*
(1)	(2)	(3)	(4)	(5)
1 South Kanara	Mysore	— 1,500	— 843	— 657

26 COORG	..	..	..			

TABLE A-IV.

Cities and towns classified by population with variations since 1901.

1. This table shows the population and distribution of sex of cities and towns at each of the last six enumerations.

2. At this Census all towns having a population of 50,000 and over have been treated as cities. The following towns though they do not have the population of 50,000 were specially treated as cities in view of their importance and city features: Palayamkottai, Pudukottai and Ootacamund.

3. The towns have been arranged in this table according to their population in 1951 and have been grouped in six classes. The number of towns in each class at the 1931, 1941 and 1951 Censuses is shown below :—

Class.	Limits of population.	Number of Census towns. 1951.	1941.	1931.
I	100,000 and over ..	13	6	4
II	50,000 to 100,000 ..	20	21	18
III	20,000 to 50,000 ..	93	59	49
IV	10,000 to 20,000 ..	169	128	115
V	5,000 to 10,000 ..	155	189	149
VI	Under 5,000 ..	23	17	15
	Total ..	473	420	350

4. This table was restricted to Classes I and II only in 1941. Fifty-eight new towns have been added at this Census and two former towns have been removed from the list. Two former towns have been added on to greater Madras and one with Banganapalle. Towns newly appearing at this Census have been printed in *italics*.

5. Where possible, the former population of places treated for the first time as towns in 1941 and at this Census has been extracted from Village Statistics. Where this could not be done, the columns have been left blank.

6. The town populations for previous Censuses are those then recorded. No adjustments have been made for intervening changes in area. The class totals are similarly unadjusted for subsequent additions to or deletions from the classes of towns.

A-IV. CITIES AND TOWNS CLASSIFIED BY POPULATION WITH VARIATIONS SINCE 1901.

TABLE A-V.

Towns Arranged Territorially with Population by Livelihood Classes.

This table shows the analysis of the urban population by livelihood classes, instead of by communities as in the previous censuses.

2. The towns in each district are arranged in the order of their population as in Table A-IV.

3. The figures for the agricultural livelihood classes I to III are not given separately but have been clubbed together.

TABLE B-I.

Livelihood Classes and Sub-classes.

This table shows by rural/urban break-up the distribution of population among the eight livelihood classes and the three sub-classes under each livelihood class, into which the economic characteristics of the people have been classified under the I.C.E.C. Scheme. The livelihood classification is based on the principal means of livelihood of the self-supporting persons, the principal means of livelihood for earning and non-earning dependants being the same as that of the self-supporting persons on whom they are dependant.

2. The principal means of livelihood is the means of livelihood which provides the largest or the major part of the income in the case of self-supporting persons who have more than one means of livelihood. In the case of other self-supporting persons it is the only means of livelihood.

3. A person has been regarded as 'Self-supporting' if the income secured by him (or her) (such as it is) is sufficient at least for his (or her) own maintenance at his (or her) present level of living (such as it is). The income secured may be in cash or kind. Anyone who is not a 'Self-supporting' person in this sense has been regarded as a dependant. An 'Earning' dependant is a person who secures an income which is not sufficient to support him. A person who does not secure any income either in cash or kind, is a 'Non-earning' dependant.

4. The non-earning dependants include persons performing housework or other domestic or personal services for other members of the same family household, but do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise. These latter persons have been classed as either self-supporting or earning dependants according to the share of income attributable to them.

5. The self-supporting persons shown in Livelihood Class VIII include also persons who derive their income otherwise than through productive activity, i.e., persons coming under the following groups, details for which are given in the fly-leaf to Economic Table B—III :—

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of jails, asylums, alms houses and recipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activity.

6. The four agricultural livelihood classes correspond to the following occupations given in the means of livelihood table of the 1931 Census :—

Agricultural Livelihood Classes.	Occupations given in 1931 Census table.
I ..	Cultivating owners, and cultivators of jhum, taungya and shifting areas.
II ..	Tenant cultivators.
III ..	Agricultural labourers.
IV ..	Non-cultivating proprietors taking rent in money or kind.

The other occupations given in the 1931 Census table correspond to the four non-agricultural classes as explained in the fly-leaf to Economic Table B—III.

NOTE :—Thirty seven villages with a population of 50,905 (25,676 Males and 25,229 Females) which formed part of West Godavari *Plains* are included in West Godavari *Agency*.

ECONOMIC TABLE B-II.

Secondary means of livelihood.

This table furnishes the numbers in each of the eight livelihood classes mentioned in Economic Table B-I, who possess a secondary means of livelihood and cross-classifies them (according to the nature of such means of livelihood) under the same eight livelihood classes.

2. The secondary means of livelihood shown for self-supporting persons is the means of livelihood next in importance to their principal means of livelihood. In respect of earning dependants, it is the means of livelihood which provides the earning, or the largest part of their income if they have more than one source of income.

3. Non-earning dependants, and self-supporting persons who have no secondary means of livelihood, are excluded from this table.

ECONOMIC TABLE B-III.

Employers, Employees and Independent workers in Industries and Services by Divisions and Subdivisions.

In this table, the self-supporting persons in the four non-agricultural classes given in Economic Table B-I, are distributed in the various Divisions and Subdivisions of Industries and Services under the Indian Census Economic Classification Scheme according to their secondary economic status, namely, employer, employee and independent worker.

2. The Indian Census Economic Classification Scheme adopted in this table, is based on the 1931 Census Scheme of Occupations. However, as recommended by the Economic and Social Council of the United Nations, it embodies extensive revision and re-arrangement of the classification given in the old Scheme, designed to improve the classification and to secure comparability with the International Standard Industrial Classification Scheme evolved by the United Nations Organization. The data arranged under four Classes, 12 Sub-classes and 55 Orders in the old Scheme, have been re-arranged under 10 Divisions and 88 Subdivisions in the present Scheme.

3. Under the present (I.C.E.C.) Scheme all employers and all independent workers have been classified with reference to the commodity produced or service performed by them individually. As regards employees, all persons engaged in production, commerce or transport (and not being domestic servants) have been classified with reference to their own activity, and without reference to that of their employer. Domestic servants have been classed in one subdivision without reference to the nature of their work. All other employees (including all managerial and supervisory employees, clerical services, messengers, watchmen and unskilled labour of every description) have been classified with reference to the commodity produced or service rendered by their employers.

4. The non-agricultural classes classified in Economic Table B-I correspond to the Divisions and Subdivisions into which they are distributed in this table, as follows :—

(a) Non-agricultural Class V (production other than cultivation) corresponds to Divisions 0 to 4. (Division 0—Primary Industries not elsewhere specified ; Division 1—Mining and Quarrying ; Division 2—Processing and Manufacture—Foodstuffs, Textiles, Leather and Products thereof ; Division 3—Processing and Manufacture—Metals, Chemicals and Products thereof ; Division 4—Processing and Manufacture—not elsewhere specified).

(b) Non-agricultural Class VI (Commerce) corresponds to Division 6 (Commerce).

(c) Non-agricultural Class VII (Transport) corresponds to Subdivisions 7·0 to 7·4 of Division 7 (Transport, Storage and Communications).

(d) Non-agricultural Class VIII (Other Services and Miscellaneous Sources) includes Division 5 (Construction and Utilities), Division 7 (Transport, Storage and Communications) with the exception of Subdivisions 7·0 to 7·4, Division 8 (Health, Education and Public Administration) and Division 9 (Services not elsewhere specified). This class also includes other miscellaneous sources of livelihood, e.g., income from investments, pensions and family remittances, proceeds of begging and other unproductive activities. These are not, however, included in this table as it is limited to Industries and Services. Hence there will be a difference to this extent between the total self-supporting persons of the non-agricultural classes in Economic Table B-I and the total of this table.

The reconciliation will be effected by adding the figures given in the next paragraph.

5. Details for persons deriving their income from the non-productive activities mentioned in the fly-leaf to Economic Table B-I, are given in the accompanying statement :—

DETAILS FOR PERSONS DERIVING THEIR INCOME FROM NON-PRODUCTIVE ACTIVITIES.

State and Districts.	Total.			Class (i).—Persons living principally on income from Non-agricultural property.		Class (ii).—Persons living principally on pensions, remittances, scholarships and funds.		Class (iii).—Inmates of jails, asylums, alms houses and recipients of doles. TABLE E.

Summary Figures By Districts and Taluks.

The areas shown in column (2) of the table for district and taluk " total " are the latest figures furnished by the Central Survey office, Madras. The areas given for " urban " are those furnished by the District Collectors. The areas for " rural " have been obtained by deducting the figures for " urban " from those for district and taluk " total". These figures differ in varying degrees from the totals of the area figures for rural units furnished by District officers.

2. The district areas furnished by the Surveyor-General, India, which have been shown in Table A-1, could not be adopted in this table as talukwise figures have not been furnished by him. The district areas given by the Surveyor-General differ from those furnished by the Central Survey office, Madras.

3. Previous census figures of population have been adjusted with reference to the merger of States, transfer of enclaves and inter-district transfers. The rural and urban population figures have been taken as they were at the 1941 and 1931 censuses and as they are at the present census, regardless of the changes of rural areas into urban areas and *vice versa* from census to census, for the purpose of calculating percentage variation between 1931–41 and between 1941–51. For calculating density for rural and urban for 1941, the areas of the towns newly formed at the present Census rounded to the nearest square mile have been deducted from the areas given for urban in column (2) for 1951 and added to the areas given for " rural ", in the districts and taluks where new towns have been recognized.

4. The distribution of population has been shown by livelihood classes and not by religion as at the previous censuses.

5. In respect of taluks which consist entirely of rural areas, figures are given for " total " only. Also for Madras City which is purely an urban area, figures are given for " total " only.

E. SUMMARY FIGURES BY DISTRICTS AND TALUKS.

District and taluk.	Area in square miles.	Population.				Percentage Variation.		Density.		Livelihood classes. Agricultural classes. I Cultivators of land wholly or mainly owned and their dependants.		II Cultivators of land wholly or mainly unowned and their dependants.
